

# Configuration Validation Automation

## Problem Statement

- Config discrepancies are causing application issues in production

## Solution Approach

## Benefits

- 0 Config issues in production by proactive detection and fix.
- Fast Config validation in few seconds
- Detects all the changes from last release; reviewed and approved from Dev.

## Sample Email Report

Hi All,  
We observed below changes in config for v1.25. Please review and let us know if it's as per expectation.

Key	Android-BetPlus	AndroidTV-BetPlus	FireTV-BetPlus
"/data/appConfiguration/screenTags/home/spotlightCarouselEnabled"	"false" > "true"	"false" > "true"	"false" > "true"
"/data/appConfiguration/screenTags/home/spotlightCollectionEnabled"	"true"	"false" > "true"	"true"
"/data/appConfiguration/screenTags/home/spotlightSingleEnabled"	"true"	"false" > "true"	"true"

Key	Android-Smithsonian	AndroidTV-Smithsonian	FireTV-Smithsonian
"/data/appConfiguration/screenTags/home/enhancedFeaturedCarouselEnabled"	"true" (New)	"true" (New)	"true" (New)

Twig Custom Report

**“This report is great. I love the concept behind this report. Thank you for setting this up.**

David Cunha  
Sr Director, Product Management

**“Many thanks for your initiative. I am personally astonished by the fact that instead of a complete config, you are sending the very excerpt showing the changes. This is IT! Fantastic work!**

Mateusz Bajer  
Director, Software Engg
